EXAMINER'S AMENDMENT

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The specific limitations of a combination of "...a meridian member extending between the poles; an indicator slidably mounted on the meridian member for movement in a north/south direction on the sphere; a first sensor mounted so as to provide a longitudinal signal representative of the rotary position of the sphere relative to the base; a second sensor mounted so as to provide a latitudinal signal representative of the position of the indicator on the meridian..." are not anticipated or made obvious over the prior art of record in the examiners opinion. For example, Kim '086 teaches a globe assembly (figure 2) having a base (18), an axle (14), a sphere representative of the earth (12), a meridian member (16), an indicator (26) and a first sensor mounted to provide a latitudinal signal (22). Ishigooka (JP 2002-182555) teaches a globe assembly which uses a plurality of sensors (5) located in at a variety of positions on the globe in order to identify a specific location for displaying a variety of information related to the specific location. However, prior art of record fails to teach or disclose an indicator that is slidably mounted on a meridian with a sensor that provides a latitudinal signal representative of the position of the indicator. It would not have been obvious to modify the invention of Kim to provide it with a moveable indicator and associated sensor since Kim does not require or indicate that such structure would be of any benefit. Additionally, although Ishigooka discloses the device which fulfills a similar if not the

same function as the applicants invention, the structure that is utilized in the Ishigooka reference does not utilize an indicator mounted on the meridian and associated with a sensor and there would be no motivation to modify the Ishigooka reference to incorporate such a structure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
